

National Workshop

on

SPSS- from Basics to Business for Beginners

This workshop will introduce the concept of practice statistics to solve problems by translating data science to useful information products. The unprocessed raw data available in real world can be processed to useful information by sound skills of data analytics and right handling of the software. Statistical package for social science (SPSS) is a user friendly and popular software among the academia, corporate and researchers but subjects to its proper handling. Data are the new frontier of 21st century and data analysts are going to be the hottest job in coming days. Keeping these in mind, the workshop has been designed to guide scholars to undergo a micro level training and to come up with suitable results using SPSS. Scholars are most welcome to bring their own data and problems for discussion during the hands on training programme.

Objectives

- To acquaint research scholars with appropriate selection of statistical tools for different types of data.
- To train the participants to use SPSS for analysis of different types of data.
- To give each and every participant a practical experience of conducting field study and to undergo data analysis on the same data to come up with appropriate results.
- To provide hands on training to perform statistical analyses such as t-test, one-way ANOVA, simple and multiple linear regression and Chi-squared tests using SPSS.

Seats are limited to 100 participants and registration will be made on the basis of first come first serve.

17th-19th September, 2017

Venue: Lecture Gallery - I

Gangadhar Meher University, Sambalpur, Odisha-768004
