

Workshop on
CYBER SECURITY CHALLENGES & PROSPECTS
8TH MARCH -2019

SecurEyes
Infusing Security

In today's world, cybercrime is becoming increasingly common and a dangerous threat. Any service that uses IT either on the internet or internally within the organization, become vulnerable to various attacks. Network issues, virus attacks, malware breakouts, identity thefts, hacking into important and sensitive sites and networks are on the rise. Increase in internet usage, has drawn high rate of cyber crime which have created an urgent need of cyber security. NASSCOM has estimated that India alone will need 1 million cyber security professionals by 2020. With the increasing dependency on the IT and Internet services all are getting more and more exposed to such crimes and need to be secure.

Objectives:

1. HACKERS BOOTCAMP
2. The programs focus on imparting education in various areas Cyber Security.
