Scopus Data Base Analyzer: Refine your Research

This workshop will cover tools and techniques available in the citation database of Scopus for maximizing and assessing your research visibility and impact. Further, this platform will help researchers for advanced searching with Scopus, a large abstract and citation database covering the peer-reviewed literature: scholarly journals, books, and conference proceedings. Again, this tool will help using citation database of Scopus for maximizing and assessing research impact. The Scopus data base covers publications in science, technology, medicine, social sciences, arts, and humanities. Thus, this session will provide tips to authors, editors, publishers and institution on using Scopus features smart tools to track, analyze and visualize research citations and impacts.

Objectives

- To learn useful tips and techniques to improve your literature searching.
- To understand the nuances of evaluating your research impact.
- To demonstrate the key stages of citation analysis for authors, comparing journals with Cite
- Score, linking your Scopus Author ID to other research tools.
- To develop the ability to understand the requirements for publishing in Scopus indexed
- journal.
